

Introducing the new
Mold holder system
for K2 fusion machine

Katanax is proud to present its most recent upgrade to the K2 fluxer: a mold holder made with high-purity alumina.

This new holder assembly is fully compatible with all K2 units and will provide:

- Much better resistance to sagging
- Longer life expectancy
- Excellent chemical stability
- Easier access to molds
- Faster crucible cooling and slightly faster mold cooling
- Wider clearance between the crucible rim and the mold upon pouring

Please contact Katanax or your local reseller to take advantage of a **limited-time introductory price**.

Available for the 4 standard¹ mold dimensions:

- 30-mm (cat. part # **KP0430A**)
- 32-mm (cat. part # **KP0432A**)
- 35-mm (cat. part # **KP0435A**)
- 40-mm (cat. part # **KP0440A**)

Holders are available complete, or in spare parts kits.

The Katanax Team

¹ Please check with Katanax before ordering, if you are using molds from another manufacturer.
