

Product Overview:

Sietronics was established in 1968 and has a wealth of experience in the supply and support of analytical technologies, our head office is in Canberra where we have our own laboratory to not only provide sample analysis but also technical support and application development for our customers.

Sietronics offer products, service and expertise in the following areas:

XRF/ XRD:

- XRF/XRD analytical equipment
- Rental of hand held XRF equipment
- Siroquant software
- Automatic Fusion Machines
- XRF consumable supplies
- Certified reference materials
- XRD laboratory service
- Radiation monitors

Analytical Equipment

- Carbon and Sulphur analysers
- Thermogravimetric analysers
- Automated pH analysers & Titration systems
- Moisture Balances
- Particle size and shape analysers

Sample Preparation Equipment:

- Crushing, milling and grinding equipment
- Laboratory balances
- Ultrasonic baths

Oil & Fuel Analysis Equipment:

- Online oil analysis
- Oil and fuel testing
- Wear metal analysis
- Viscometers
- Reference materials

Certified Reference Materials:

- MBH standards
- QCD standards
- Others

Miscellaneous Laboratory Equipment:

- Balances
- Ultrasonic Baths
- Water baths
- Ovens
- Stirrers
- Shakers/ Mixers..... please ask!

Manufacturers Product Summary

InXitu: Portable innovative XRF/XRD instruments Terra and BTX

Siroquant: XRD software

SE International: Radiation Monitors

Kittiwake: Oil condition monitoring equipment

Chemplex: XRF preparation equipment

Glen Creston: Sample preparation equipment including McCrone micronising mills

MBH: Certified reference material

QCD: AA, ICP and ICP MS standards

UDY: Laboratory grinders

Haver & Boecker: Particle sizing equipment

Labfit: Thermogravimetric analysers, Carbon/Sulphur analysers, Automated pH analysers/Titrators

Thermoline: Laboratory equipment

Ohaus Balances: Laboratory, analytical and floor standing

Unisonics: Ultrasonic baths

SEM: Laboratory Equipment
